

Product Overview

BioKill® -160

BEDBUG TERMINATOR

Don't dispose of contaminated items, purify them instead. Powerful commercial equipment that immediately kills bedbugs, their eggs, mites, and other pests in mattresses, box springs, bedclothes, drapes, and clothing. Uses both photocatalytic and clean ozone purification. Operates in conjunction with a sealed contents bag having quick connect hoses to the BioKill®-160. Saves extermination time and client money.

Model 160

Includes

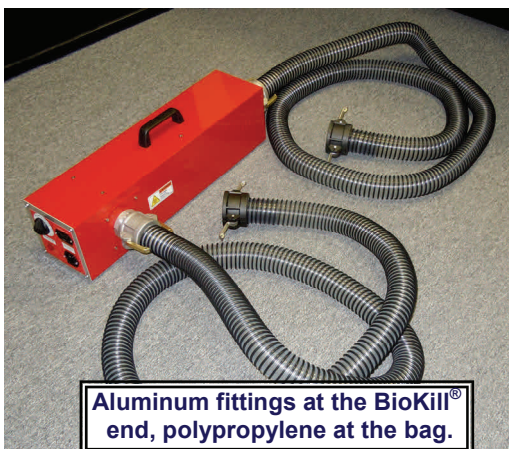

- BioKill® - 160
- Two bags
- Two 10' hoses
- Four bag caps
- Two hose plugs

Positive cam-lock

Temporarily seal bag and hoses.

Aluminum fittings at the BioKill® end, polypropylene at the bag.

king size test mattress

Guaranteed to Kill Bedbugs

Place contaminated articles in and seal the polypropylene contents bag with cam-lock hose fittings to the BioKill® -160. All living matter in the sealed bag is destroyed within 10 minutes, including bedbugs, dust mites, fleas, ticks, spiders, mold, bacteria, viruses and odors. Bag and hose connections may remain temporarily sealed while the BioKill® is used elsewhere. Remove purified articles in about an hour and use immediately.
